

- 01 **Long Range:** Manually operate Hunter controllers up to two miles away
- 02 **Rugged:** Heavy-duty, water-resistant shell built for the most demanding job sites
- 03 **Save Time:** Monitor system performance without unnecessary trips to and from the controller

ROAM XL LONG-DISTANCE REMOTE

Durable, Long-Range Remote Built for Contractors

Large-scale sites such as shopping centers, industrial properties, college campuses, and multi-unit housing complexes require high-powered remotes that can cover long distances. Hunter's ROAM XL remote is a powerhouse in a small package — but don't let its size fool you. While it's small enough to fit in your pocket, it boasts an open-field range of up to two miles. It features a large LCD display, simple push-button operation, and 128 different programmable addresses. This compact yet high-powered remote can easily pair with any Hunter controller equipped with SmartPort® connectivity. With available run times up to 90 minutes, the ROAM XL eliminates the need to walk back and forth from the controller during system maintenance, repair, or winterization.

Remote control is a must-have for any irrigation professional. Immediately save time and money with the flexibility and increased efficiency of Hunter's ROAM XL.

Model

Long-distance remote for commercial and residential applications

ROAM XL

(w/o antenna)

Height: 6¼"

Width: 3"

Depth: 1¼"

Specifying Options

Hunter remotes require the installation of a SmartPort wiring harness*.

SMARTPORT

The SmartPort connector is wired to the AC1, AC2, and REM terminals on the controller, and allows quick connection to any Hunter remote.

* ACC, ACC2, I-Core, and ICC2 controllers include pre-wired SmartPorts for remote operation.
